

# Explanation of the 2023 RDA Regional Report

**Indicator:** The Results Driven Accountability (RDA) reports performance and program effectiveness results on a variety of indicators. Detailed information on the indicators can be found in the 2023 Accountability Manual RDA Chapter 12.

**2023 RDA PL 0 Cut Points or State Rate:** This is the range of performance for a PL 0 or, if the indicator is a Report Only indicator, this is the average performance (state rate) of all regions in the state.

**2023 Numerator:** This represents the number of events observed in a particular indicator (e.g., Number of ALP STAAR 3-8 passers).

**2023 Denominator:** This represents the total population evaluated in a particular indicator (e.g., Number of EB (Not Served in BE/ESL) STAAR 3-8 takers).

**2023 Region Rate:** This represents the performance of each region as a whole on a particular indicator (Rate = Numerator/Denominator).

The screenshot shows a web interface for the Texas Education Agency's RDA report. At the top right, it says "Texas Education Agency" and "2023". Below that, there are filters for "Region: ZZ ESC" and "Region: 03 ESC". The main content area is a table with a large black redaction box covering most of the data. A small white box in the center of the redaction says "Example of masked data; see footnote." To the right of the redaction, there is a white box with the text "2021-2023 Change: This represents the change in the regional rates from 2021 to 2023 (2021-2023 Change column=2023-2021)". Below the redaction, there is another white box with the text "Performance Level (PL): The result that occurs when a performance level standard is applied to a group's performance on an indicator. RDA performance levels generally range from 0 to 3."

Example of masked data; see footnote.

**2021-2023 Change:** This represents the change in the regional rates from 2021 to 2023 (2021-2023 Change column=2023-2021)

**Performance Level (PL):** The result that occurs when a performance level standard is applied to a group's performance on an indicator. RDA performance levels generally range from 0 to 3.
