1.3

The table shows how many miles Easton rode his bike last week.

Distance Biked

Day	Number of Miles
Monday	$\frac{1}{4}$
Tuesday	$\frac{1}{2}$
Wednesday	$\frac{1}{4}$
Thursday	$\frac{1}{4}$
Friday	$\frac{1}{4}$
Saturday	$\frac{1}{4}$
Sunday	$\frac{1}{4}$

How many total miles did Easton ride his bike last week?

A model is shaded to represent an expression.

Two horizontal bars, each divided into four equal segments. The first three segments of each bar are shaded gray, and the fourth is white.

A large black rectangular area containing a grid of 10 small squares arranged in 2 rows and 5 columns. The first three columns of this grid are shaded gray, and the last two are white. To the right of the grid, the text "= 1." is visible.

At the bottom of the interface, there is a calculator-like keypad with buttons for numbers 2, 3, 5, 6, and mathematical symbols like a fraction bar, multiplication, and subtraction.

1.9

The values in the table represent the equation $y = 6x$. Complete the table to represent the relationship between the

at all answers will be used. Move the correct answer to each box in the table. No

x	y
6	36
20	120
